

ILC-800

INFLATABLE PRODUCTS

A unique and revolutionary 8.70m inflatable landing craft designed specifically for the safe transportation of personnel, cargo or small vehicles across water. Easily transported in deflated form with optional hard case or soft valise. Craft can be deployed from an aircraft, ship or vehicle and inflated by powered compressor in minutes. Operation and maintenance is simple and offers extreme shallow draft capability. Operated via a single or twin outboard motors and the bow ramp can be lowered or raised as required.

LOA:	8.70 m
Beam:	3.80 m
Load Capacity:	3000 kg
Persons:	30
Recommended HP:	40
CE Certification:	Category C
Approximate Weight:	450 kg
Pack Size:	2.2 m X 1.3 m X 1.3 m
Main Floatation Chambers:	10
Detachable Transom:	Aluminium
Soft Valise:	Yes
Provided Ancillary Equipment:	Manual Craft Valise Transom & Transom Valise Tool Kit Manual Inflation Pump

Optional Extras:

- Paddle x 2
